## Professional Summary

Analytical MCA graduate specializing in data analytics, reporting, and product implementation. Proficient in Power BI, advanced Excel (VBA/Power Query), and database management to translate complex data into business insights. Proven track record of cross-functional collaboration, system testing (UAT), and delivering seamless user experiences

## Skills

**Data Analytics and Reporting:** Advanced MS Excel, Power Query, VBA, ETL Processes, Data Interpretation

**Technology Stack:** SQL, Python, OOPs Concept.

**Data Visualization Tools:** Power BI, Tableau, Interactive Dashboard Design, Presentation Layouts.

**Development Tools:** GitHub, VS Code, Git

**Product & Business Analysis:** User Acceptance Testing (UAT), Test Case Development, Requirements Mapping, Bug Tracking. Agile/Scrum, Requirement Gathering (BRDs/FRDs).

**Analytical Abilities:** Exploratory Data Analysis (EDA), Insight Generation, KPI Reporting, ETL Concepts, Dashboard Development, Stakeholder Coordination, Technical Communication, Cross-functional Collaboration.

## Experience

### Data Annotation-Deccan AI (Freelance)

- Automated repetitive data preparation tasks to improve analytical efficiency.
- Performed data cleaning, transformation, and preprocessing to support accurate analysis and reporting.
- Ensured data quality through validation, consistency checks, and preprocessing techniques.

## Projects

### SafeGuard Pro | Python, React, Scikit-learn, Joblib, Leaflet, TensorFlow, XGBoost, SHAP Feb 2026 – Apr 2026

- Developed an AI-based crime prediction system using ML achieving 85% accuracy on 100K+ crime records.
- Performed data preprocessing and feature engineering using Pandas, NumPy, and Scikit-learn.
- Integrated ML model using Joblib and created APIs (/predict, /map-data)
- Visualized crime-prone areas using Leaflet maps and Recharts dashboards.
- Built a full-stack application using React and Flask with real-time prediction via REST APIs.

### Orion Hardware-Interactive Retail BI Product Deployment | Power BI, SQL Dec 2025 – Jan 2026

- Mapped business requirements to SQL schemas and utilized Power Query ETL to clean and prepare 38K+ transactions.
- Developed interactive Power BI dashboards (KPIs, funnels, and maps) to track \$2.3M in sales and \$286K in profit.
- Identified a \$21K sub-category profit leak and delivered optimization reports using MS Excel and PowerPoint.

### M C Stays— AI Integrated Accommodation Platform | Python, React.js, Prisma ORM Oct 2025 – Dec 2025

- Architected a dual-service system using React/Node.js and a Python FastAPI ML microservice for high-performance AI integration.
- Developed an AI matching engine using Scikit-learn to provide personalized PG recommendations and lifestyle-based roommate compatibility.
- Implemented predictive models for vacancy forecasting and automated yield management using Linear Regression.
- Integrated automated PDF agreements, QR-code check-ins, and heuristic-based fraud detection for a secure rental workflow.

## Education

|                                                                                                                  |                                       |
|------------------------------------------------------------------------------------------------------------------|---------------------------------------|
| <b>Master of Computer Applications (MCA)</b><br>Pimpri Chinchwad University, Pune, Maharashtra                   | <b>2024 – 2026</b><br>CGPA: 8.42 / 10 |
| <b>Bachelor of Computer Applications (BCA)</b><br>Ambalika Institute of Higher Education, Lucknow, Uttar Pradesh | <b>2021 –2024</b><br>Percentage: 71%  |

## Certifications

- Database and SQL for Data Science with Python – **IBM**
- Foundations of AI and Machine Learning - **Microsoft**
