Professional Summary

Analytical MCA graduate specializing in translating raw datasets into actionable business insights. Proficient in SQL database querying, Python data pipelines (Pandas, NumPy), and Power BI dashboard development. Combines strong exploratory data analysis (EDA) foundations with hands-on experience managing data quality validation at scale for NVIDIA AI initiatives. Seeking to leverage data manipulation and statistical tracking skills in a dedicated Data/Business Analyst role.

Skills

Programming & Databases: SQL, MySQL, Python (Pandas, NumPy, Matplotlib).
Data Visualization Tools: Advanced Excel, VLOOKUP, HLOOKUP, XLOOKUP, Pivot Tables, Power BI.
Development Tools: GitHub, VS Code, Git.
Core Concepts: Core Java, OOPs Concepts, DBMS, Agile/Scrum, Requirement Gathering (BRDs/FRDs), UAT.
Analytical Abilities: Exploratory Data Analysis (EDA), Data Cleaning, Data Visualization, Statistical Analysis, Insight Generation, KPI Reporting, Reporting, ETL Concepts, Predictive Analytics, Data Transformation, Dashboard Development, Data Quality Assurance.

Experience

Associate Process Executive | Randstad India Pvt. Ltd. (Client: NVIDIA)**June 2026 – Present**

- Process and manage large-scale image, video, and sensor datasets that support computer vision and autonomous vehicle machine learning applications.
- Perform quality validation of labeled datasets to ensure compliance with annotation standards and maintain **90%+** accuracy requirements.
- Review and maintain high-quality training datasets for machine learning applications.
- Perform data quality assurance (QA) and validation metrics, systematically identifying and correcting labeling anomalies to ensure dataset consistency.

Projects

SafeGuard Pro | Python, React, Scikit-learn, Joblib, Leaflet, TensorFlow, XGBoost, SHAP**Feb 2026 – Apr 2026**

- Developed an AI-based crime prediction system using ML achieving 85% accuracy on 100K+ crime records.
- Performed data preprocessing and feature engineering using Pandas, NumPy, and Scikit-learn.
- Integrated ML model using Joblib and created APIs (/predict, /map-data).
- Visualized crime-prone areas using Leaflet maps and Recharts dashboards.
- Built a full-stack application using React and Flask with real-time prediction via REST APIs.

MC Stays–AI Integrated Accommodation Platform | Python (FastAPI), React.js, Prisma ORM**Dec 2025 – Jan 2026**

- Architected a dual-service system using React/Node.js and a Python FastAPI ML microservice for high-performance AI integration.
- Developed an AI matching engine using Scikit-learn to provide personalized PG recommendations and lifestyle-based roommate compatibility.
- Implemented predictive models for vacancy forecasting and automated yield management using Linear Regression.
- Integrated automated PDF agreements, QR-code check-ins, and heuristic-based fraud detection for a secure rental workflow.

Education

Master of Computer Applications (MCA)**2024 – 2026**
Pimpri Chinchwad University, Pune, MaharashtraCGPA: 8.42 / 10

Bachelor of Computer Applications (BCA)**2021 –2024**
Ambalika Institute of Higher Education, Lucknow, Uttar PradeshPercentage: 71%

Certifications

- Database and SQL for Data Science with Python – **IBM**
- Foundations of AI and Machine Learning - **Microsoft**
