

AARAV SHARMA

Sector 62, Noida, India | +91 98765 43210 | aarav.sharma.dummy@email.com | linkedin.com/in/aarav-sharma-dummy

PROFESSIONAL SUMMARY

Passionate and impact-driven Senior Data Scientist with over 5 years of extensive experience designing, implementing, and deploying production-level machine learning models and AI-driven solutions. Proven expertise in structuring robust data pipelines, engineering highly predictive features, and leveraging state-of-the-art NLP frameworks alongside Large Language Models (LLMs) to unlock unstructured data challenges. Adept at steering technical roadmaps, translating intricate technical metrics into executive business strategies, and mentoring cross-functional engineering teams within agile enterprise environments.

TECHNICAL EXPERTISE

Languages & Core:	Python, R, SQL, Bash, Regex
Machine Learning:	Supervised/Unsupervised Learning, KNN, Naive Bayes, Random Forests, Gradient Boosting (XGBoost, LightGBM), Statistical Modeling
NLP & GenAI:	LLM Fine-Tuning (LoRA, QLoRA), Transformers (Hugging Face), Word Embeddings (Word2Vec, BERT), TF-IDF, LangChain, Vector Databases
Data Engineering:	Apache Spark, ETL/ELT Pipelines, Feature Engineering, Pandas, NumPy, Scikit-learn
Cloud & MLOps:	AWS (S3, EC2, SageMaker), GCP, Docker, CI/CD Pipelines, MLflow, Git

PROFESSIONAL EXPERIENCE

Senior Data Scientist	July 2023 – Present
Nexus Analytics Solutions	Noida, India
- Lead the architectural design and deployment of scalable machine learning systems and high-performance predictive models including Random Forests and ensemble methods, improving model accuracy by 18%. - Architected an advanced internal unstructured text processor utilizing advanced Regex, TF-IDF representations, and custom Word Embeddings, reducing raw document classification latency by 35%. - Spearheaded the fine-tuning and implementation of Large Language Models (LLMs) using Hugging Face frameworks to automate context-driven insight extraction from complex enterprise datasets. - Collaborate closely with Product and Engineering stakeholders to define the technical data science roadmap and align model objectives directly with business KPIs. - Mentor 4 junior data scientists and engineers, establishing code review practices and standardizing local MLOps frameworks to optimize model deployment cycles.	
Data Scientist	August 2021 – June 2023
Innova Tech Labs	Noida, India
- Designed and maintained production-level data pipelines and sophisticated feature engineering tracks utilizing AWS SageMaker and Apache Spark, handling over 10M+ daily transactions. - Developed and deployed localized statistical models utilizing K-Nearest Neighbors (KNN) and Naive Bayes algorithms for real-time anomaly detection, achieving a precision metric of $P \geq 0.94$. - Implemented standardized CI/CD pipelines for automated testing and continuous integration of Python-based machine learning models, heavily cutting down deployment overhead.	

Associate Data Scientist	June 2020 – July 2021
<i>CoreData Systems</i>	<i>New Delhi, India</i>
• Performed exploratory data analysis and structured regression models to extract actionable operational business insights. • Assisted senior infrastructure engineers in deploying analytical dashboards and setting up basic data extraction workflows using Python and SQL.	

EDUCATION

Master of Technology (M.Tech.) in Computer Science & Engineering	2018 – 2020
<i>Indian Institute of Technology (IIT)</i>	<i>Delhi, India</i>
• Specialization: Data Science, Intelligent Systems, and Advanced Statistical Modeling.	
Bachelor of Technology (B.Tech.) in Computer Science	2014 – 2018
<i>Delhi Technological University (DTU)</i>	<i>Delhi, India</i>
