

Rahul Deshpande

Associate Software Engineer

Aundh, Pune, India | +91 91234 56789
rahul.deshpande.dev@email.com | github.com/rahul-d-codes

PROFESSIONAL SUMMARY

Detail-oriented Associate Software Engineer specializing in backend software design, relational database optimization, and application architecture. Demonstrates strong foundational programming habits built through rigorous technical academic structures. Following graduation, dedicated two years to intensive self-driven technical specializations, open-source code architecture contribution, and freelancing, leading directly into a successful enterprise deployment role.

TECHNICAL CORE

- **Languages & Databases:** Python, Java, SQL, MySQL, PostgreSQL
- **Frameworks & Systems:** Django, Flask, Git, RESTful Web Services, Linux Server Basics
- **Core Competencies:** Object-Oriented Programming (OOP), Data Structures, SDLC Automation

PROFESSIONAL EXPERIENCE

Associate Software Engineer

July 2024 – Present

InnovateTech Software Labs

Pune, India

- Collaborate inside an Agile team framework to design and ship high-performance REST APIs using Python and Django, servicing internal analytics data flows.
- Optimized database index tracking paths and structured relational joins, reducing query runtimes across staging environments by 20%.
- Write comprehensive automated unit test cases, boosting functional application baseline code coverage to 82%.

POST-GRADUATION TECHNICAL SPECIALIZATION & FREELANCE PERIOD

July 2022 – June 2024 (2-Year Professional Transition Window): Dedicated this period to technical upskilling, remote contract freelancing, and competitive algorithmic programming. Actively contributed to open-source repository architecture while mastering core Python frameworks to successfully transition into enterprise production software environments.

Independent Freelance Developer & Upskilling

July 2022 – June 2024

- Designed, built, and launched custom business website solutions and automated inventory tools for local retail clients using Python and Flask.
- Solved 250+ data structure and algorithmic challenges on platforms like LeetCode to solidify logical computation habits.
- Earned recognized industry specializations, including the Advanced Python Web Architecture Professional Certificate.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Engineering

Pune Vidyarthi Griha's College of Engineering (PVG)

Graduated: June 2022

Pune, India

- **First Class with Distinction**
- Cap-Stone Academic Project: Built a secure encrypted file storage system utilizing Python cryptographic layers.
