

Arjun Deshmukh

Data Engineer

Mahadevapura, Bengaluru, India | +91 94444 55555
arjun.deshmukh.de@email.com | github.com/arjun-de-dummy

PROFESSIONAL SUMMARY

Data Engineer with 4+ years of professional experience specializing in the architecture, optimization, and maintenance of large-scale data pipelines. Expert in building batch and real-time streaming ETL/ELT pipelines, implementing data lakes, and optimizing multi-terabyte data warehouses. Pragmatic technologist focused on data modeling integrity, system reliability, and cutting cloud compute overheads.

TECHNICAL SKILLSET

- Core Languages:** Python, Scala, SQL, Bash
- Data Frameworks:** Apache Spark, PySpark, Apache Hadoop, Apache Kafka, Apache Airflow
- Storage & Analytics:** Snowflake, Amazon Redshift, PostgreSQL, Hive, AWS S3, Delta Lake
- DevOps & Platforms:** AWS (EMR, Glue, Lambda), Docker, Git, CI/CD, Linux Server Admin

PROFESSIONAL EXPERIENCE

Data Engineer
Vortex Analytics Systems

September 2022 – Present
Bengaluru, India

- Designed and engineered a scalable distributed data pipeline utilizing PySpark and Apache Airflow, processing over 4 TB of daily clickstream data into Snowflake.
- Optimized legacy SQL execution blocks and cluster storage partition partitioning models, reducing cloud storage and warehouse compute costs by 28%.
- Implemented a real-time data streaming pipeline using Apache Kafka to capture live customer transactions, lowering downstream analytics latency from 2 hours to sub-minute thresholds.
- Collaborated with Data Science and BI teams to architect custom optimized feature stores, facilitating accelerated model deployments.

Associate Data Engineer
CoreData Infrastructure Labs

July 2020 – August 2022
Pune, India

- Maintained, audited, and debugged internal multi-stage ETL code bases using Python, tracking pipeline execution errors through customized log handlers.
- Built and deployed customized AWS Glue jobs and schema registries to safely ingest structured relational client databases into Amazon S3 data lakes.
- Authored modular SQL scripts to perform regression analytics, missing-value sanitization, and verification metrics across staging layers.

EDUCATION

B.Tech. in Information Technology
Pune Institute of Computer Technology (PICT)

2016 – 2020
Pune, India
